

TECHNICAL DATA SHEET

F&L OXY 118 is an oxygenated, leaded race fuel created for high compression engines needing a constant fuel that creates exact performance. Formulated to work with engines with compression ratios of up to 15.5:1, OXY 118 should be dyno tuned while paying close attention to fuel volume. With the increased oxygen content, increased jetting or injector pulse width might be required. This fuel will definitely give you results along with a competitive edge.

Fuel Family:	Oxygenated Leaded Racing Fuel
Fuel Name:	OXY 118
Octane (R+M)/2:	117.5
RON:	120.0+
MON:	115.0
Specific Gravity:	0.712
RVP:	6.50
Oxygenated:	5%
Leaded:	Yes
Stoichiometric Ratio:	14.18
Color:	Yellow

QUALITY. INTEGRITY. PERFORMANCE.
